PROFESSIONAL SUMMARY

Frontend Developer and UI/UX Designer with a rare end-to-end skill set — from Figma wireframes to production-ready React/Next.js code. Builds scalable web applications, data-rich dashboards, and client-facing product interfaces with equal focus on code quality and design precision. Experienced in API integrations, component architecture, state management, and translating complex business requirements into clean, intuitive user experiences. Brings product thinking to every feature: understands the business goal, designs for the user, and ships maintainable frontend code. A strong fit for product teams, digital agencies, and startups that need one person who can own both the look and the logic.

WORK EXPERIENCE

Frontend Developer & UI/UX Designer | Multi Marketer / Remote (Dubai, UAE)

Aug 2024 - Present

- Owned frontend delivery across Multi Marketer products, mainly [Khwarizmi Metrics](#) and [Nizam Accounting](#), from requirements/Figma to React/Next.js implementation, QA, and release.
- [Khwarizmi Metrics](#): Built analytics dashboards, API-connected screens, reusable UI patterns, and report-builder experiences using React.js, Next.js, TypeScript, and Tailwind CSS.
- Integrated marketing, analytics, payment, and AI APIs into unified dashboard workflows, improving data visibility and reducing manual reporting effort by approximately 40%.
- [Nizam Accounting](#): Enhanced ERP modules across Inventory, Invoicing, Credit Notes, Recurring Invoices, Chart of Accounts, Purchases/Suppliers, and reporting workflows.
- Validated REST API flows and shipped fixes for stock transfers, FIFO/cost layers, valuation and aging reports, low-stock alerts, linked payments, invoice PDFs, and account-code generation.
- Refactored large screens into reusable components, hooks, and utilities while improving TypeScript safety, form validation, dark/light UI consistency, notification UX, and CI/build stability.

Frontend Developer | vbooking / Remote

Apr 2025 - Mar 2026

- Worked on vbooking, a travel booking platform connected to the Vindo CRM ecosystem, supporting booking flows, package management, client-facing travel pages, and operational dashboard features.
- Built React/Vite frontend modules for dynamic package forms, flight and transfer booking flows, itinerary day/night logic, operations filters, and responsive client views with reusable components.
- Integrated API-driven flows across search, fare rules, passenger details, metadata handling, sorting, pagination, image-with-text sections, and search engine themes to improve accuracy and usability.

UI/UX Designer | Sharakat Company / Remote (Saudi Arabia)

Jan 2024 - Apr 2025

- Designed responsive web interfaces, product screens, user flows, and Figma prototypes for 3+ product lines across diverse industries and client types in the MENA region.
- Created design systems with 60+ reusable UI components, wireframes, journey maps, and interaction patterns to maintain consistency and speed up frontend delivery.
- Collaborated cross-functionally with frontend, backend, and product teams to align design decisions with technical constraints, business goals, and implementation quality — bridging the gap between design and engineering.
- Improved product usability through iterative design reviews, interface simplification, and user-centered decisions, reducing reported UI friction points by approximately 25% across design cycles.

Teaching Assistant - Part-Time | Arab Academy for Science, Technology & Maritime Transport (AAST)

Jan 2025 - Jun 2025

- Mentored 30+ students across 2 semesters in human-centered software design, covering ideation, UX research, UI prototyping, frontend implementation, and presentation.
- Guided students in converting Figma prototypes into responsive React.js web applications, with 90%+ of projects reaching successful deployment by the end of the semester.
- Supported students through the full software development lifecycle, from concept validation and interface design to implementation, testing, deployment, and review.

PROJECTS

Jeel Tech (jeeltech.vercel.app) | Next.js • TypeScript • Tailwind CSS • Dashboard Architecture

2023

- Built an Arabic LMS and learning analytics platform with a modular dashboard architecture across 15+ pages, enabling new feature additions with zero structural refactoring and strong UI consistency.

- Designed and built a high-performance landing page with GSAP and Three.js interactions, achieving sub-2s load time and smooth 60fps animation rendering across target browsers.
- Performed responsive QA testing, cross-browser checks, animation debugging, and performance optimization to maintain a polished production user experience.

- Designed 20+ product screens for a specialized boat and fishing management platform, then built the dashboard and landing pages in Next.js with a 3-person frontend team.

SKILLS

Technical Skills

Frontend: HTML5 • CSS3 • JavaScript ES6+ • TypeScript • React.js • Next.js • Tailwind CSS • Bootstrap • Material-UI

React Architecture: React Hooks • Component Architecture • Reusable UI Components • State Management • Redux • Zustand • Context API • Async Data Flows

SaaS & Dashboards: Admin Panels • Metrics Dashboards • Analytics UI • Data-Rich Interfaces • API-Connected Interfaces • Design Systems

Testing & Quality: Jest • React Testing Library • Unit Testing • E2E Testing Fundamentals • Cypress/Playwright Awareness • ESLint • Prettier • Cross-Browser Testing

Design & UX: Figma • UI/UX Design • Pixel-Perfect Implementation • Responsive Design • Wireframing • Prototyping • Accessibility Awareness

Tools & Workflow: Git • GitHub • Vercel • npm • pnpm • CI/CD • Agile • SDLC • Code Reviews

AI-Assisted Development: Claude AI • Codex • MCP • AI-Assisted Debugging • Component Generation • Documentation Workflows

Backend & Data: REST APIs • Firebase • Supabase • MongoDB Basics • Payment APIs • Analytics APIs

Soft Skills: Ownership • Attention to Detail • Product Thinking • Customer-Focused UX • Team Collaboration • Analytical Thinking • Problem Solving

EDUCATION

Bachelor of Computer Science - GPA: 3.00 (Very Good)

Arab Academy for Science, Technology & Maritime Transport (AAST) - Alexandria, Egypt

Graduated: 2024

CERTIFICATIONS

- React.js Nanodegree Program - EFWD, Egypt (May 2022 - Jun 2022)
- Software Testing Foundations - EFWD, Egypt (Mar 2023)

LANGUAGES

Arabic - Native English - Upper Intermediate

SOCIETY WORK & VOLUNTEERING

Frontend Developer Volunteer - IEEE Egypt (Built websites & landing pages with React, Next.js, Tailwind)

AI Competition - 3rd Place, IEEE Egypt | Project: Virtual Quiz Game

Nov 2023 - Jan 2024
Nov 2022
